

DRUG AND EXPLOSIVE DETECTION EQUIPMENT

Official Representative

ALERT Explosives Detection

- TNT/PETN?
- RDX/Nitrate?
- Ammonium?
- Chlorate?
- TATP?

ISS has established a trusted partnership with a recognised World Leader in the supply of proprietary on-site Drug, Drug Precursor and Explosive Identification & Detection equipment. These kits have been developed, manufactured and distributed to both the Law Enforcement and civilian markets where they consistently pass the highest certification and test protocols. It is in operational use with Military, Law Enforcement and Security Agencies around the world, including Argentina, Australia, France, Germany, India, Israel, Romania, South Africa and the USA, and produces fast and highly accurate drug & explosive detection and identification in the field to laboratory testing standards.

As a "Secure Laboratory safely contained in a plastic receptor" this equipment provides you with the following benefits:

TNT/PETN, RDX/Nitrate

One kit detects a "family" of explosives

- Urea Nitrate
- Ammonium
- Ammonium Nitrate
- TATP/ HMTD
- Chlorate/Bromate

The General Explosive Screening Kit can detect the presence of any of 5 main explosive types . The specific explosive can be identified by using one of the Definitive Test Kits. An Ammonium Nitrate test has been developed for the military, now widely used in operations to counter Improvised Explosive Devices (IED). These kits are outrageously simple to use and produce fast & highly accurate explosive detection & identification in the field to laboratory testing standards.

- Precise with no false positives
- Results in seconds
- High sensitivity to detect trace amounts to as low as 10 nano grams
- Durable & secure plastic design
- Easy and safe to use
- Environmentally safe
- Cost effective

The General Drug Screening Kit detects the presence of 21 different drugs and precursors. **Uniquely** it can detect Synthetic & Cannabinoid drugs - the **only** capability of this type on the market. The number of substances that comprise synthetic & cannabinoid drugs are in the hundreds, mainly as a derivative of benzylpiperazine basic alkaloids. These kits react positively to any derivative of benzylpiperazine to indicate the presence of illicit and / or non-illicit drugs.
