

THERMAL IMAGE EQUIPMENT INFRA-RED CAMERAS

Infinite Security Solutions (ISS), is a leading Business Risk Management and Security Consultancy which has built up a strong and close relationship with a number of Technical Partners so as to provide our clients with a comprehensive range of appropriate, “fit-for-purpose” equipment and systems in order to deliver effective and customised security solutions to meet their needs and objectives.

One of our Specialist Products is the Thermal Image Camera.

HS-324: 19mm Lens
* 24° (H) x 18° (V) FOV

HS-324: 2X Extender
* 12° (H) x 9° (V) FOV

HS-307: 65mm Lens
* 7° (H) x 5° (V) FOV

Thermal Image Systems are powerful tools in the fight against crime. They allow you to see suspects in total darkness, through smoke, and light foliage. A Thermal Image handheld thermal imaging camera allows you to see the suspect, without revealing your own location.

Contrary to other technologies, thermal imaging cameras need no light whatsoever to produce a crisp image. They can see through light fog and smoke, in practically all weather conditions. This makes them the perfect tools for security and law enforcement applications. They produce a crisp image even on the darkest of nights.

Thermal imaging cameras do not only produce a clear image in total darkness, they are also extremely useful during daylight. Thermal contrast is extremely difficult to mask. Someone trying to hide in shadows or bushes and people that are trying to camouflage themselves, will become clearly visible on a thermal image. Thermal imaging cameras are also not blinded by glare from the sun. They produce a crisp image in practically all weather conditions.

Law enforcement missions require officers to respond in a moment's notice. Thermal Image's line of thermal camera systems for law enforcement operations give officers the tactical advantage they need to respond effectively and safely, whenever they're called.

Thermal Image Systems thermal imaging cameras are being used worldwide by police and customs departments and by private security companies that are sending walking patrols out to secure an area.

There is no longer a need to use the less effective night vision technology.
