

## UAV UNMANNED AERIAL VEHICLE

**Infinite Security Solutions (ISS)**, is a leading Business Risk Management and Security Consultancy which has built up a strong and close relationship with a number of Technical Partners so as to provide our clients with a comprehensive range of appropriate, "fit-for-purpose" equipment and systems in order to deliver effective and customised security solutions to meet their needs and objectives.

One of our Specialist Products is the UAV – an Unmanned Aerial Vehicle.

Designed and manufactured with the benefit of years of both commercial and military Unmanned Aerial Systems operation and experimentation, these UAVs are focussed on professional grade acquisition and superior data output to provide the very best aerial imaging.

The result – a truly capable, industry-leading deployable solution in a rugged, east-to-operate system which saves clients and operators both time and money.

### Dimensions:

- 5.5kg (12lbs) Maximum All Up Weight
- 2.6m (8'6") Wingspan
- 1.4m (4'7") Length

### Key Characteristics:

- Electric motor + Lithium Polymer batteries
- Simplified flight operations
- Independent flight monitoring systems
- Strong and lightweight construction
- Multiple safety systems including return on fail
- Hand launched / Parachute Recovery

### Performance:

- Cruise speed 50-60 km/h
- 60-90 minute endurance
