

# SECURITY AUDITING SERVICES (INCL: SAFETY & COMPLIANCE)

*Infinite Security Solutions* (ISS) conducts audits, specialising in Security Audits. These audits can be carried out in relation to, or in alignment with Government or International standards/requirements, Corporate Policy or standalone depending on your organisation.

Audits are not an inspection of your Organisation nor should they appoint blame. Audits are a method of assessing your Organisation's policies, protocols, plans, processes and procedures (P5) to ensure they are functioning correctly. Where there are weaknesses or inadequate documentation covering any of the P5s in place ISS can develop a solution to solve the issue/s.

ISS can audit your Organisation's review policy, protocols, plans, procedures and processes to ensure compliance and that best practices are implemented. Where equipment is part of your Organisation ISS will make certain that its function is in line with the processes and that there are measures in place to ensure it is maintained and services are per the companies requirements / manufactures recommendations.

Of course, Security and Safety overlap and the solution / systems / procedures in place must take this into account.

ISS can provide experienced Auditors conducting audits to ISO 9000 Standard for Security related requirements which are accepted by certifying bodies in both Land and Marine Industries. Utilising our range of Security Risk skills and our depth of knowledge on Land and in Maritime environments, including the International Ship and Port Facility Code (ISPS) and ISO 28000, ISS can provide periodic reviews, internal and / or external audits to aid your Organisation in continuing compliance.

Our team of experienced Auditors are IRCA (The International Register of Certified Auditors) accredited and whether you require a 1st, 2nd or 3rd party audits ISS can provide you with an Audit Team that suits your Organisation's individual requirements.

In addition, ISS provides unbiased assessments of security measures to identify lapses and work with your CSO/SSO, PFSO or in-house security team to recommend procedures and operational changes to achieve optimal security and compliance, where applicable.

As ISPS subject matter experts, ISS can also review Security Plans, Ship or Port Facility, to report recommendations and, if necessary, prepare documentation outlining amendments to your Plan to help facilitate a fast and efficient resubmission to the Authorities for approval.
