

TRAINING SERVICES (CIVILIAN SECURITY)

Additional Training Courses
available on request

Infinite Security Solutions (ISS) delivers flexible solutions to manage and mitigate threats during times of crisis and we offer a wide variety of Training Services across the Maritime sectors including the Onshore and Offshore Oil & Gas Industry, Port Facilities and Marinas as well as to Military Services such as the Army, Navy, Marines and Coast Guards.

ISS has developed a variety of training courses to suit all levels of personnel from Operators to Command-and-Control Units functioning within a maritime environment. Our training methodology follows the principles of instruction, discussion and practical application to ensure that course participants have a thorough understanding of the subject matter as well as the confidence to act and respond in actual threat scenarios. Our training ethos is driven by the desire to provide and deliver the highest quality services and standards. Therefore, we are committed to delivering comprehensive, off-the-shelf and specifically-tailored courses to meet our clients' requirements while being mindful of constraints on staff, funding, location and time.

ISS has helped military units, classification societies and clients by designing and developing tailored System Approaches to Training (SAT) which ensures delivery of the highest quality instruction combining modern training techniques with Maritime Security expertise from our team of specialists.

The following modules are examples of courses that can be offered as stand-alone courses or incorporated into a programme:

- **COXSWAIN TRAINING**

All maritime work requires skilled coxswains who are proficient safe operators in all weather conditions, day or night. ISS provides this basic course where candidates will be taught topics such as navigation, general boat husbandry, maintenance as well as general knowledge based subject such as understanding maritime environments.

- **COXSWAIN TRAINING - ADVANCED**

This advanced aspect of training concentrates more on tactical operations and includes methods of transfer at sea in all weather conditions, both overtly and covertly.

- **DRIVER TRAINING**

Driving Assessment 1 includes: Instinctive Driving Theory, Hazard Awareness & Accident Avoidance Drills Practical, Anti-Locking Brake System, Security Envelope, Drivable Terrain, Sensory Overload, Vehicle Language, Shuffle Steering & Vehicle Dynamics, Vehicle Safety Enhancements, Defensive Driving Theory, Defensive Driving & The System of Vehicle Control Practical, Hazard Recognition, Information processing, Speed Awareness, Use of Gears, Safety Margins.

Driving Assessment 2 (Defensive) includes: Advance Driving Theory and Practical; on & off-road, river crossing, snow / ice driving and tailored actions developed around scenarios.

- **MEDICAL TRAINING**

Dealing with maritime casualties whether boating, diving or any offshore incident is obviously compounded by the environment and requires identification, management and safe evacuation of injured parties.

TRAINING SERVICES (MARITIME and OIL & GAS)

Additional Training Courses
available on request

Infinite Security Solutions (ISS) delivers flexible solutions to manage and mitigate threats during times of crisis and we offer a wide variety of Training Services across the Maritime sectors including the Onshore and Offshore Oil & Gas Industry, Port Facilities and Marinas as well as to Military Services such as the Army, Navy, Marines and Coast Guards.

ISS with its training partner **SEATAG AustralAsian Services Pte Ltd** is here for the specific purpose to assist you and your industry to maximise your current skill base and to grow that skill base; by working with you to provide you with industry specific, sector specific and company specific training which complies with industry-best-practice and all relevant statutory and regulatory requirements. We can deliver:

- **TRADITIONAL SHORE BASED COURSES**
- **FACE TO FACE COURSE ON BOARD SHIPS AND RIGS**
- **E LEARNING**
- **DISTANCE LEARNING**
- **ONLINE LEARNING**

Companies around the world are concerned with skill – skill development, skill shortages, and skills mismatches. As with many other industries, the Offshore Oil and Gas and Marine industries are seeking to increase its 'stock' of skills because they are considered intrinsic to innovation, competitiveness and productivity.

Our approach is to reduce the cost for our clients and where possible our methodology is to deliver courses to our clients on-board assets; this process reduces time away from the work place or time away from the family if training is required whilst on the off swing/hitch. Like wise our 'e', Distance or Online courses have been integrated into our Blended Learning courses whereby the theory is delivered online and the practical is delivered either on-board or in a training facility as appropriate. Training can be grouped into four areas: Maritime, O&G, HSE and Lifting:

- **OUR MARITIME COURSES SUCH AS STCW ARE DELIVERED AND CERTIFIED BY PANAMA AND SINGAPORE FLAG**
- **WE CAN SUPPORT OUR CLIENTS WITH BRIDGING AND BST COURSES DEPENDING ON THERE REQUIREMENTS FOR MOST AREAS IN THE O&G INDUSTRY.**
- **OUR HSE COURSES ARE INTERNATIONAL ASSOCIATION OF DRILLING CONTRACTORS (IADC) APPROVED AND COVER MANY ASPECTS OF O&G REQUIREMENTS**
- **OTHER AREAS OF TRAINING SUCH AS CANE OPERATION, FORKLIFT TRUCK AND RIGGING AND SLINGING ARE APPROVED BY AMERICAN PETROLEUM INSTITUTE (API)**

A FULL LIST OF COURSES IS AVAILABLE ON REQUEST

TRAINING SERVICES (MILITARY & SECURITY)

Infinite Security Solutions (ISS) delivers flexible solutions to manage and mitigate threats during times of crisis and we offer a wide variety of Training Services across the Maritime sectors including the Onshore and Offshore Oil & Gas Industry, Port Facilities and Marinas as well as to Military Services such as the Army, Navy, Marines and Coast Guards.

ISS has developed a variety of training courses to suit all levels of personnel from Operators to Command-and-Control Units functioning within a maritime environment. Our training methodology follows the principles of instruction, discussion and practical application to ensure that course participants have a thorough understanding of the subject matter as well as the confidence to act and respond in actual threat scenarios. Our training ethos is driven by the desire to provide and deliver the highest quality services and standards. Therefore, we are committed to delivering comprehensive, off-the-shelf and specifically-tailored courses to meet our clients' requirements while being mindful of constraints on staff, funding, location and time.

ISS has helped military units, classification societies and clients by designing and developing tailored System Approaches to Training (SAT) which ensures delivery of the highest quality instruction combining modern training techniques with Maritime Security expertise from our team of specialists.

ISS MILITARY TRAINING COURSES INCLUDE:

- Maritime: Coxswain, Diving, Explosive Ordnance Disposal (EOD) and Maritime Interdiction
- Land: Basic, Intermediate and Advanced Training

The following modules are examples of courses that can be offered as stand-alone courses or incorporated into a programme:

▪ COXSWAIN TRAINING

All maritime work requires skilled coxswains who are proficient safe operators in all weather conditions, day or night. ISS provides this basic course where candidates will be taught topics such as navigation, general boat husbandry, maintenance as well as general knowledge based subject such as understanding maritime environments.

▪ COXSWAIN TRAINING - ADVANCED

This advanced aspect of training concentrates more on tactical operations and includes methods of transfer at sea in all weather conditions, both overtly and covertly.

▪ DIVER TRAINING - BASIC

This component provides course participants instruction on the basic knowledge and skills, both theoretical and practical aspects, of diving using air. This component is a prerequisite for basic understanding, knowledge and experience prior to participating in the Advance Diver Training component.

▪ DIVER TRAINING - ADVANCED

This training component is designed to advance the diving skills of course participants to the next level and includes using Oxygen and/or mixture gases.

TRAINING SERVICES (MILITARY & SECURITY)

■ DRIVER TRAINING

Driving Assessment 1 includes: Instinctive Driving Theory, Hazard Awareness & Accident Avoidance Drills Practical, Anti-Locking Brake System, Security Envelope, Drivable Terrain, Sensory Overload, Vehicle Language, Shuffle Steering & Vehicle Dynamics, Vehicle Safety Enhancements, Defensive Driving Theory, Defensive Driving & The System of Vehicle Control Practical, Hazard Recognition, Information processing, Speed Awareness, Use of Gears, Safety Margins.

Driving Assessment 2 (Defensive) includes: Advance Driving Theory and Practical; on & off-road, river crossing, snow / ice driving and tailored actions developed around scenarios.

■ IMPROVISED EXPLOSIVE DEVICES (IED), MINES AND UNEXPLODED ORDNANCE (UXO) AND EXPLOSIVE ORDNANCE DISPOSAL (EOD)

The ability to identify IEDs, mines and UXOs, as well as potential booby-trap awareness is an indispensable and critical skill both on land and in the maritime theatre. Once a potential ordinance or explosive device has been identified, action is required to eliminate the respective threat. The aim being to prevent or limit the vulnerability of the potential situation and possible consequences.

■ MARITIME INTERDICTION TRAINING (MID)

With experienced and specialist skills of former members of the United Kingdom's Military Services we are able to provide exceptional training courses in Maritime Counter Terrorism (MCT) training. For further details please email your enquire to us directly.

■ MEDICAL TRAINING

Dealing with maritime casualties whether boating, diving or any offshore incident is obviously compounded by the environment and requires identification, management and safe evacuation of injured parties.

Additional Training Courses (general and specialist) available on request
