

# CONSULTANCY - LAND

In the current challenging global environment **Infinite Security Solutions** (ISS) can meet all your Risk and Security requirements.

Although Security measures put in place at any given time remains effectual, all too often Risk and Security Consultancy is carried out too late in a project to be cost-effective. Ideally Risk and Security Consultancy should take place during the budgeting phase, commencing with the concept and design, and continue through each stage of the project. Incorporating implementation costs into the project's initial budget allows for greater financial savings in the long term.

ISS has the unique ability, with its wealth of knowledge and experience in Risk and Security, onsite or offshore, to assess and formulate a diverse range of Security Solutions and Systems ('standalone' or integrated) to meet client's individual requirements thereby ensuring maximum cost efficiency.

ISS will develop the documentation required at Government, Corporate or Managerial Levels and will oversee the Implementation through to Training phases including Drills, Exercises and Audits (see Services) to ensure compliance under various Government rules and regulations or International Codes. ISS Consultancy also encompasses Risk Management, Policy and Procedures and Command and Control aspects.

## ❑ **Documentation (Corporate, Country, Area or 'standalone' including plan alignment / integrations)**
